Bring your used batteries here for free

Doing good can feel so good. **So regularly bring your used batteries to a collection point.** Not just the AAA batteries from your remote control, but also those you don't immediately think of, such as the rechargeable battery in your headphones or your laptop. Bebat recovers the raw materials from these batteries too, which means they no longer need to be extracted from nature. **Recycling together, that's better for all of us.**

Recycling together,
better for all of us
